DO YOU RECOGNIZE A PLASTIC PACKAGING?

(SPOILER: NO. NOT EVERYTHING THAT LOOKS LIKE PLASTIC IS PLASTIC!)

We are **plastic** packaging

We are not **plastic** packaging

Only packaging (like bottles, flasks, bags, wrappers) should go in the plastic recycling bin.

SUCH AS: placing the **designated bags (transparent yellow)** on the days and times indicated.

Anything that was not meant to contain a product must be disposed of in the residual waste or taken to the Ecocenter.

Using the wrong container compromises recycling and increases costs.

NOT ALL PLASTIC IS THE SAME

In the non-recyclable waste

In the non-recyclable waste

In the non-recyclable waste

Did you know...?

Hard plastic items have different chemical compositions and are incompatible with the packaging recycling process. Melting foreign polymers together contaminates the plastic, resulting in a poor-quality, brittle material that cannot be reused to make new products.

Did you know...?

The plastic casing of small appliances can be misleading. Since they contain circuits or batteries, they must never be thrown in the plastic bin. If crushed by collection vehicles, the batteries inside them can spark and cause serious fires at processing facilities.
